

SISTEMI SCORREVOLI PER PORTE

SISTEMA INVISIBILE BREVETTATO MAGIC 2

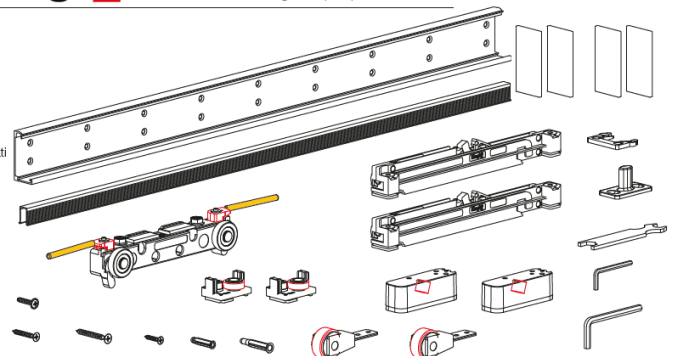

Magic2 Il sistema invisibile originale per porte scorrevoli

80 kg

N.2 Fermi ammortizzati

Larghezza porta personalizzabile

Sistema brevettato

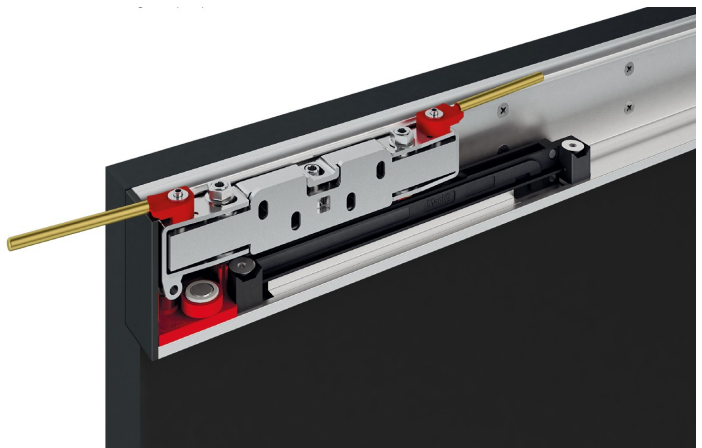

| OLD CODE | NEW CODE | |
|-------------|-------------|---------|
| MAGIC2/1100 | K.0031.1.01 | 1100 mm |
| MAGIC2/1800 | K.0031.2.01 | 1800 mm |

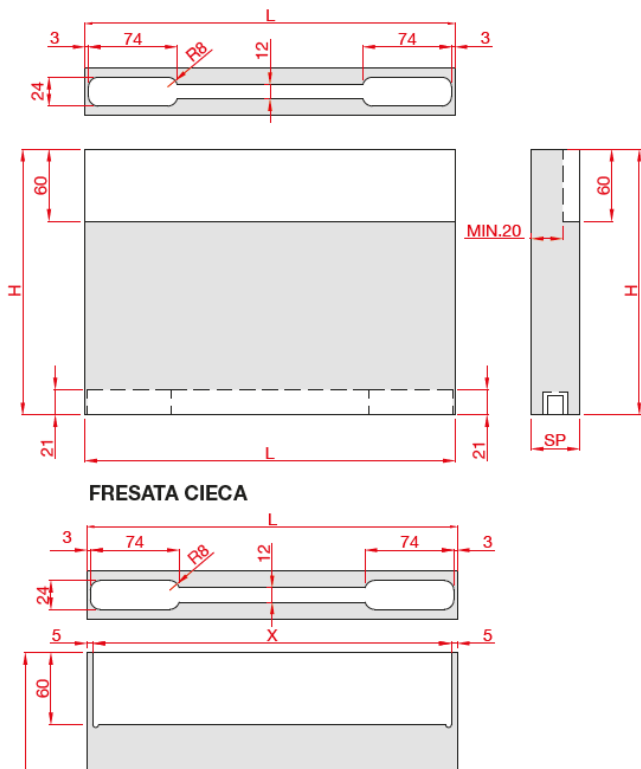

Guida inferiore silenziosa

Per migliorare ancor di più lo scorrimento, il sistema Magic2 integra una guida inferiore rinforzata in zama (resistente e versatile), che scorre in un profilo in plastica molto silenzioso.

STAFFE – PINZE ECLISSE

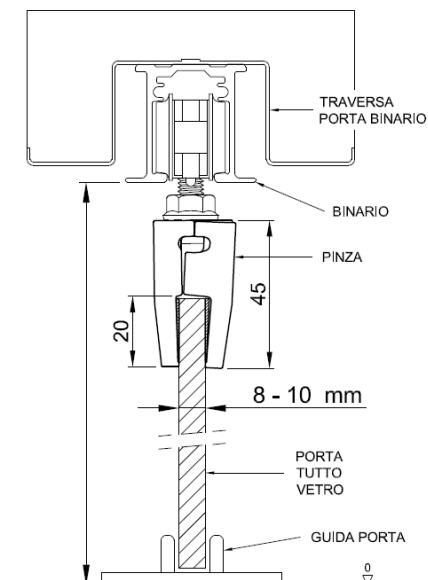

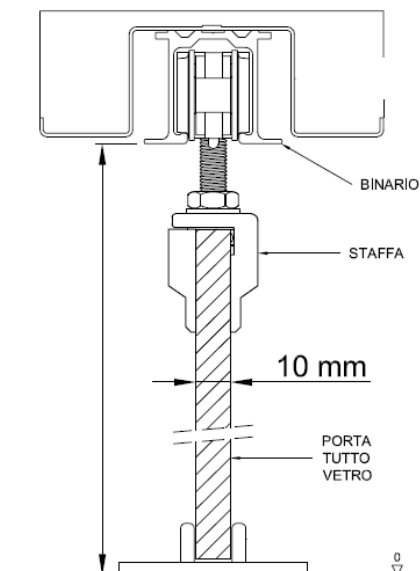

Staffe

La staffa è un supporto alternativo alla pinza che consente di applicare una porta in vetro ad un sistema di scorrimento senza stipiti e cornici coprifilo. Si installa se preventivamente sono state effettuate due incisioni "a coda di rondine" sulla parte superiore del pannello porta.

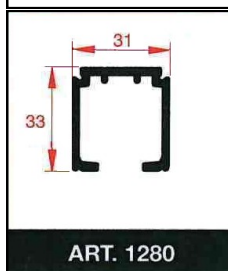

Pinze

Le pinze sono una tipologia di fissaggio per porte scorrevoli in vetro prive di finiture esterne. Non necessitano lavorazioni particolari per l'installazione, poiché si fissano direttamente sulla parte superiore della lastra in vetro. Finitura disponibile in nichelato-spazzolato.
